Creating a Hummingbird Friendly Environment

Here are a few tips to help you invite hummingbirds to your yard:

- ✈ Containers with plants attractive to hummingbirds in or near outdoor living spaces will bring fearless hummers in closer for observation.
- ✈ Hostas and impatiens are wonderful plants to bring hummingbirds into shady areas of the landscape.
- ✈ Vining plants with trumpet shaped flowers are a particular favorite of hummingbirds. Allowing these plants to climb on trellises or deck rails is another way to bring hummers in closer.
- ✈ Red and Orange are favorite colors of the hummingbirds. Plants that bloom in these colors will attract the hungry eye of hummers more quickly.
- ✈ At least two feeding stations separated by 5 or 6 feet are recommended as hummingbirds can be very territorial.
- ✈ Flowering trees that produce a deep or trumpet shaped flower like catalpa and buckeye will also attract hummingbirds to your yard.
